

Skip Dahlstrom  
4362 River District Way  
Berkeley Lake, GA 30096  
404-661-1128

- 1) I graduated from Mercer University with a Business Degree.
- 2) Married for 43 years to Sheri Dahlstrom, have two married children and four grandchildren.
- 3) Member of Perimeter Church.
- 4) My career and passion existed in the outdoor industry business for 43 years. We represented multiple key manufacturers in the fishing, hunting, and law enforcement product arena for the 10 southeastern states.
- 5) President/Managing Partner of a 12-man sales organization with sales exceeding \$40 million in annual sales.
- 6) As an avid hunter since the age of 15, I learned crucial skills and ethics regarding animal behavior, feeding patterns, reproductive cycles, habitat management, along with a deep appreciation and understanding of nature.
- 7) I have been blessed to hunt in dozens of States in the US, Canada, Argentina, Africa, & Mexico.
- 8) I am ongoingly involved in helping manage my friend's 15,000-acre plantation for 20 + years in Meriwether County, Georgia collaborating with the plantation manager on premise, and a biologist to assist in managing wildlife.
- 9) I have proudly been a resident in the city of Berkeley Lake for 11 years, represented the River District HOA board for five years, was elected president for two of those years.

### **City codes, Ordinances, and Management**

- 1) Work cohesively with Mayor Salter and the city council members to further make our city safer, healthy, and a thriving community.
- 2) Review current codes on the books to look for updates, deletions and improvements.
- 3) Enhance communication between all the different HOA's in our city.
- 4) Promote the positive local and national reputation of our awesome city.
- 5) Fiscal transparency on city finances and investing in our future.

### **Deer Management Concerns**

- 1) Deer to Deer diseases- CWD (Chronic Waste Disease) & Black Tongue.
- 2) Deer to human transmission - Tick Borne Diseases such as Alpha Gal, Lime Disease, Rocky Mountain & a few other more.
- 3) Pets being attacked are becoming common.
- 4) Deer being impelled on fences has increased way too often.

- 5) Frequent Deer vehicle collisions.
- 6) Costly landscaping damage.
- 7) Deer are destroying the understory of the Greenspaces, which causes harm to other wildlife as well as the Deer forage. This promotes invasive and non-edible plants to flourish.
- 8) Coyotes pose a significant threat to our pets; however, they have little effect on the deer population.
- 9) The harvested deer can be donated to a hunger charity.

### **Geese Population**

- 1) Ruining the beach area with their feces. Which increased the lakes' E-Coli levels.
- 2) Damage to residents docks and property.
